those remedies which operate in unison with the animal economy—with the arrangements of the constitution of the human system—visiting every gland, organ, and vessel, with its salutary and healthy influence. This the mineral practice cannot perform; for, while one poison, mercury, for instance, may act efficaciously on a particular disease, it invariably lays the foundation for a distressing complaint, habitoal weakness, nervous timidity, unhealthy action of the animal organs, or a constitutional tendency to ill health continued through life, rendering the subject a burden to himself and his friends. The most respectable and intelligent physicians of the times, are adopting this mode of practice; for proof of which, we publish the following extract of a letter addressed to Dr. Hibbard, by a physician of high standing in the state of Maine:

Fatract of a letter from Dr. J. P. Alders, Beifast, Mc. Dr. Hibbard of the Reformed practice, as laught in Ohio, and being fully convinced of its superior efficacy in combatting disease. Candial people are fast learning the horrid effects of Mineral poisons, to produce distinct diseases, occasioned by their destructive use. More than half the rheumatisms, caries of bones, nicers and sores, besides innumerable other diseases, in hundreds it cases that the subscriber has cured or greatly benefited, were first produced by the use of Mercuty. If any science, wrofession or society demands reform it is the medical,—The use of Mercuty and other mineral poisons were the erroneous inventions of misled Physicians and ought to be superceded by the more consistent and older practice of a scientific vegetable practice. The world was more free from disease, before the use of minerals as medical remedies, than it has been since. Minerals have made more disease than they have cured, and the misery which they have produced, in every circle of community, ought to be an indubitable reason to spura them from the Materia Medica. In the mejority of cases, the foregoing medicines will be all thet is required for family use; but in case they should not, those who will call on the undersigned, can have advice gratts, and medicines and board on the most reasonably.

Chase for the right of his stove for the County of Windsor, begs leaves to call the attention of the public to the same. The stove is beyond doubt more economical and convenient than any other cooking stove in use. It is convenient, be cause of its peculiar construction, and economical, for the reason that it will save three fourths of the fuel necessary to be consumed in other stoves, in order to do an equal amount of cooking. It contains two overs of large dimensions, which can in an instant have the temperature so chem ged by dampers, as to be adapted to baking or roasting the ged by dampers, as to be adapted to baking or roasting the most delicate as well as the coarsest food. The boiling demost delicate as well as the coarsest food. The boiling de-department is perfect in every point of view. Six boilers can be used at a time, The broiling department is so con-structed, that the smoke is not suffered to pass into the room, being conveyed directly into the stove. Owing to the peculiarity of the principles upon which this stove op-erates, some of the heat from the fire chamber is suffered to pass directly into the pine, while all the coldest air in the stove is so discharged. This is done by an air chamber for re-rarefying the air and smoke after it has parted with its heat and, in such a manner, as to produce a very strong draught —thus all the heat generated must be applied to some prac-tical purpose.

HITCHCOCK'S ANTI-BILIOUS PILLS.

Look at this and Read! DR JARED HITCHCOCK, more than thirty years DR JARED HITCHCOCK, more than thirty years since invented, and prepared a composition of pills for the Billious Cholic, and for some two or three years used them only for that disease, and gave them the name of Cholic Pills; but discovering from their operation, the powerful effect on the Liver and its secretory ducts as a dechatroent and detergent medicine, induced him to extend the use of them in other diseases (vii) Cholera Morbus, Blackvonnit, Cholera, Billious Cholic, and other pains in the bowels, Dysentary, Despepsia, or Indigestion, Ague and Fever, Remittent and Intermittent Fever, Cooks and Coughs, and they have been found by their expectorating operation to be efficacious in diseases of the lungs. Herowoffiers them to the public under the appellation of ANTi-alLifol. S. PILLS, which experience fines untivalual for entency, usculess and safety. They are a medicale well calculated to remove the cause of disease in its first attack on the Signature of the public with the control of the course of physic; and don't he nown to my discerning and reflecting united, that when the cause of disease is removed it can no longer exist; and there is nothing but the effect of what has taken place to ere is nothing but the effect of what has taken place

DEAR FRIEN'S EAR FELLOW CITIZENS! purchase and pursue the directions given on the Labels for any disease where Emetics or Cathartic's are escial (and one or the other or both are necessar; in almost every disease to cleanes the stomach and bowels) and you will undoubtedly realize a great saving of pain, time and money; benide the danger you run of loss of health and life.

Mr. ALLES FULLEN of Double Branches, Anderson Dis-District S. C. writes us as follows; (viz.) "Dear Sir.—The box of pills which I obtained from you several years since to the amount of S., is nearly exhausted, and I am desirous of ascertaining by what means I shall get a new supply. Besides those which I had, have never heard of the pills in all my travels in the southern country, where, in my view, there are much needed."—Further he says, "if they were conveyed here I think it would be the means of introducing this unrivailed medicine (i. e. in my view) more exwith the street of the Stove in fact in one year in addition to the street of the Stove in fact in one year in addition to the street of the Stove in fact in one year in addition to the street of the Stove in fact in one year in addition to the street of the Stove in fact in one year in addition to the street of the Stove in fact in one year in addition to the street of the Stove in fact in one year in addition to the street of the Stove in fact in one year in addition to the street of the Stove in see, have no hesitation in recommending it in pecuniary point of view to every one, whether they already have or have not other stoves.

Woodstock, Vt., June 14th 1940.

This certifies that have used S. L. Chase's Cooking Stove for all the purposes of cooking Washing &c issual in families and find it to be the most economical and convenient cooking stove which I have ever used or seen and from experiment I find that it requires no more than one fourth of the fuel necessary to be consumed in any other cooking stove which I have each or seen calculated to do me equal amount of cooking. The ovens of the stove surpass any thing of the kind in use they bake and roast admirably well. In a word the stove is without a fault and I would most confidently recommend it to all persons an want of stoves.
